

DEZIGN FORMAT IS OFFICIALLY CERTIFIED AS A PARTICIPANT OF THE LOWCARBONSG PROGRAMME

In line with the Singapore Green Plan 2030 targets and the government's national agenda on achieving net zero emissions, Dezign Format has recently enrolled in the LowCarbonSG programme to work towards decarbonisation.

Dezign Format has successfully attained the LowCarbonSG logo, and is a certified participant in the programme.

Singapore (11 November 2024) – Dezign Format is officially on board the LowCarbonSG programme, a capacity-building initiative developed for locally based businesses across diverse sectors to monitor and reduce their carbon emissions.

Launched by the Ministry of Sustainability and the Environment in 2021, LowCarbonSG is an initiative helmed by the UN Global Compact Network Singapore (GCNS), with support from the National Environment Agency (NEA) and Enterprise Singapore (ESG). Companies enrolled in this programme will be able to gain access to various tools and resources, such as the Carbon & Emissions Recording Tool (CERT), which guides participants through a comprehensive recording standard.

To enrol in this programme, the team at Dezign Format attended an exclusive one-day Sustainability and Carbon Management Workshop conducted by GCNS to learn more about the CERT, alongside other complementary information to facilitate the adoption of sustainable solutions. A robust tool designed to allow companies to trace their Scopes 1, 2 and 3 emissions, the CERT is able to provide the team with the capability to consciously track and monitor our carbon footprint and actively work towards decarbonisation.

Through participating in LowCarbonSG, the team is also looking to leverage GCNS' resources and their community of solution partners who can provide various solutions and technical advisory in reducing carbon emissions, allowing us to further reduce our ecological footprint. As we work towards decarbonisation, the team hopes our strategic vision of embracing sustainability will drive a transformative shift within the industry, setting a standard that encourages others to prioritise sustainable innovation and contribute towards a greener economy for a more resilient future.
